Top View

The top view shows a 2D lattice with several distinct regions and particles. On the left, there is a small cluster of particles (red, green, cyan) near a blue rectangular region. A red arrow points from this region towards the center. In the center, there is a large cluster of particles (red, green, cyan) and a blue rectangular region. To the right, there is a large rectangular region filled with vertical yellow and blue lines, representing a different material or phase. Various colored particles (red, green, cyan) are scattered throughout the lattice, some appearing to be moving or interacting with the structures.
